

*Love is
Your
Choice*

NLOV®

Here at NLOV® we are here to help YOU connect with your true love. Is there a special someone that you click with, but they never commit? Well, one NJECTION® can solve your problems! The first person the injected individual sees becomes his or her true love. NLOV® is specifically formulated to target the medial temporal lobe and stimulate the brain into associating the feelings of love with the first person it sees.

~

NLOV® is 100% safe! The brain's neurons are not damaged or destroyed; rather, they are rewritten and reformatted via subtle electrical polarization.

~

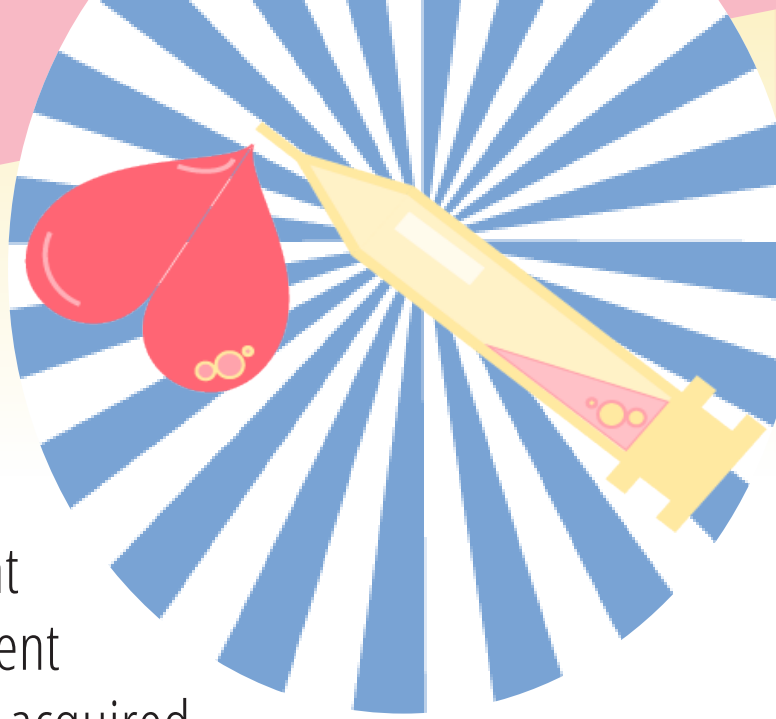

Some particularly stubborn individuals may require more than one NJECTION®. If your target is susceptible to stubbornness, then preplan and use restraints to ensure their cooperation!

~

Individuals can be NJECTED® up to 3 times per month! (Warning: More than 3 NJECTIONS® per month will result in the individual being reduced to an amorous, drooling blob for 2 weeks until the excess product wears off.)

NLOV®

Ask your doctor about NLOV®,
today! NLOV® is a prescription
love drug intended for co-patient
application. Co-patient

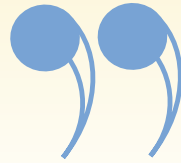

prescriptions are acquired

by a regular patient, who then administers
the medication to the planned co-patient.
NLOV® uses a safe and effective method,
similar to the imprinting processes that
take place in nature. When a baby chick
hatches, it becomes attached to the first
moving object it sees. The chick believes
this imprinted object is its

mother. In this same way, the

NJECTED® person imprints on
the first moving object (person) they see.

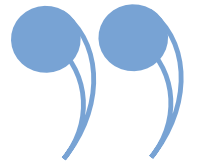

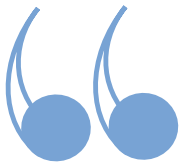

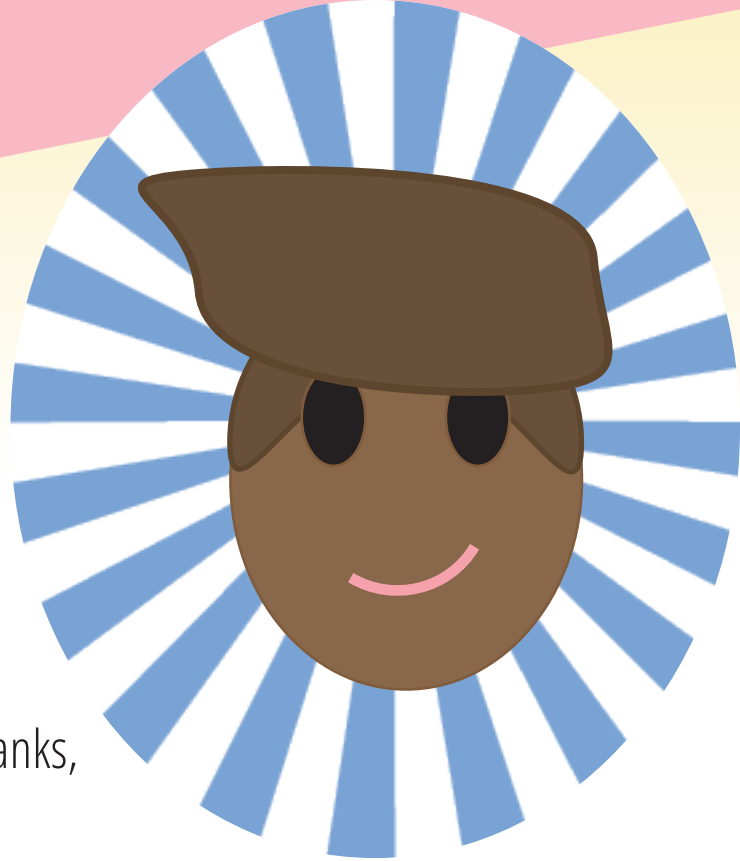

The drugged person (NMATE®) now
believes the imprinted person to be
their true love.

“My marriage was falling apart. The love from my spouse had changed to spite.

After NLOV, we couldn't be happier!

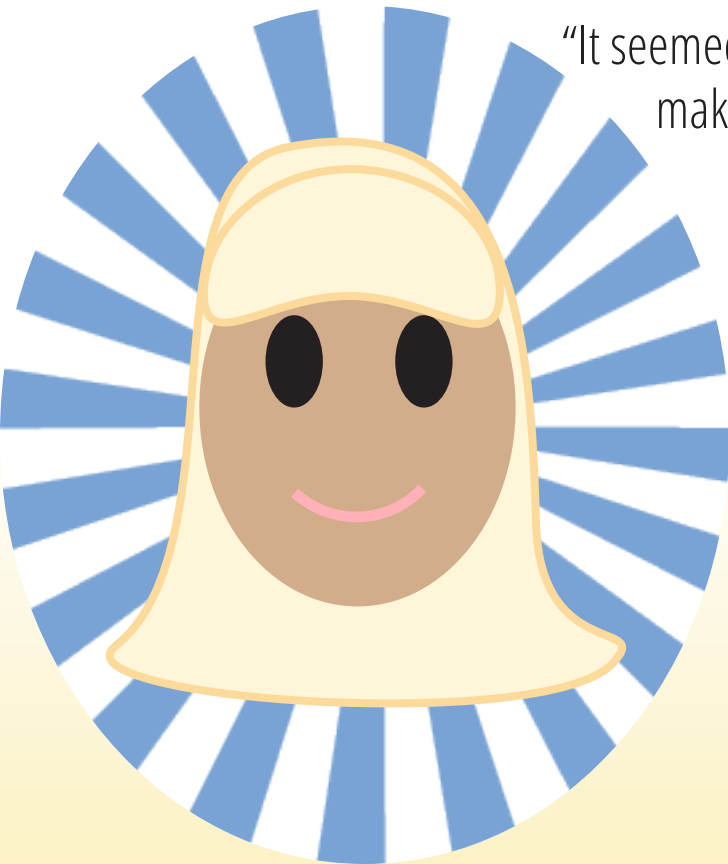

Our relationship has never been stronger. Thanks,
NLOV!”
Justin Sider - Buffalo, NY

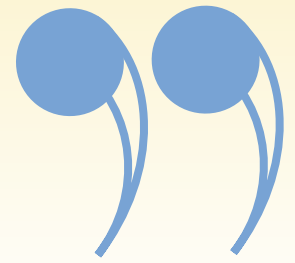

“It seemed we would never get engaged. He was always making excuses. After one injection, he proposed immediately.

*We've been married three years now,
with 12 kids!”*

Jessica Cuniculus - Detroit, MI.

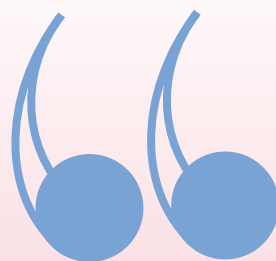

NLOV®

“Before this product, I was desperate and I couldn’t get a date. Friends labeled me trisexual, because I would try anything. I went to parties, drank and did drugs until I didn’t care who I ended the night with, but I soon realized I wanted some stability. I saw a brilliant advertisement for NLOV and knew that this was my chance to finally get ahead. I wanted to find someone who was powerful and dangerous. Eventually, I met an art professor, after cornering him in his office, he awoke a little dizzy and completely in love. We’ve been living happily together since that day.

We don’t have much in common and there’s not a lot of compatibility but he will always love me. That’s my choice. Thanks, NLOV!”

Tiffany Despero - San Jose, CA

NLOV®

Harness the power of the brain! We help you show your love the beautiful person that you are and their brain does the rest!

~

Prank your friends! Inject their most hated adversary and watch the hilarity ensue!

Disclaimer: Product has not been tested on animals. Humans were sufficiently gullible for the purposes of this study. Side effects may result in abnormal rashes and subjects falling in love with the first kitchen appliance they see. Adverse reactions include hate-overriding love and super-human strength. Serum may cause temporary luminescence.

~

Be careful during the imprinting process. If there are accidental interruptions, a re-imprint may be necessary. Re-imprinting can be harder to establish and may cause confusion with previous imprinting. You'll want to avoid possible messy love triangles with a family member (or family pet).
